Production notes

- CMYK conversions are process-color approximations derived from the approved RGB/HEX palette.
- Pantone references are nearest-candidate guidance only; confirm final ink against a current physical Pantone guide.
- The glossy logo is raster artwork. Use supplied high-resolution CMYK TIFF for conventional print output.
- Use simplified vector symbol files for signage, engraving, vinyl cutting, embroidery digitizing, or other workflows that require clean vector geometry.
- For one-color jobs, use the monochrome logo or simplified symbol.

Spot-color reference

Approximate candidates only - verify against a current physical swatch book and printer proof.
